DESCRIPTIVE CHANGES TO SPECIFICATIONS: The following are descriptive changes to the specifications. Specifications should be adequately marked to indicate that they have been changed. Changes to the specifications are underlined in the text below for clarification.

SECTION 00010:

- a. Revised SF 1442 attached.

SECTION 00700:

- a. Replace page 00700-iv with the attached page.
 - b. On page 00700-74 delete clause 52.236-16 QUANTITY SURVEYS (APR 1984)
- ALTERNATE I (APR 1984) in its entirety and insert in lieu thereof:

52.236-16 QUANTITY SURVEYS (APR 1984)

(a) Quantity surveys shall be conducted, and the data derived from these surveys shall be used in computing the quantities of work performed and the actual construction completed and in place.

(b) The Government shall conduct the original and final surveys and make the computations based on them. The Contractor shall conduct the surveys for any periods for which progress payments are requested and shall make the computations based on these surveys. All surveys conducted by the Contractor shall be conducted under the direction of a representative of the Contracting Officer, unless the Contracting Officer waives this requirement in a specific instance.

(c) Promptly upon completing a survey, the Contractor shall furnish the originals of all field notes and all other records relating to the survey or to the layout of the work to the Contracting Officer, who shall use them as necessary to determine the amount of progress payments. The Contractor shall retain copies of all such material furnished to the Contracting Officer.

SECTION 01270:

- a. Page 3, Subparagraph 1.2.1.1, add the following subparagraph:
"c. Soundings for payment purposes shall be made by the Government at the frequency listed in the channel survey notes on the contract drawings."

- b. Page 3, Subparagraph 1.2.1.2.b, line 4, insert "low frequency (about 28KHz)" after the words "shown by"; line 5, insert "low frequency (about 28KHz)" after the words "shown by the"; and on line 8, change "7" to "10".

SECTION 01310:

- a. Page 2, Paragraph 1.3, line 2, insert "not" after the word "submittals".
- b. Page 3, Paragraph 1.3, delete "FIO" after "Standard Form 100"; after "Affirmative Action Plan"; after "List of Subcontractors"; after "Signature Authority"; and after "Drug Free Work Place Record".

- c. Page 5, Paragraph 1.7.1, delete the brackets after "Local Sponsor (Owner)" and insert the following:

SECTION 01411:

- a. Page 2, Paragraph 1.2, delete "FIO" after "Calibration Standard" and after "Daily Turbidity Monitoring".

SECTION 01452:

- a. Page 2, Paragraph 1.3, in the text under "Personnel Qualifications", delete "[Surveyor]".
- b. Page 3, Paragraph 1.3, delete the brackets on either side of "Professional Surveyor and Mapper".
- c. Page 3, Paragraph 1.3, delete "FIO" after "Letter of Authority".
- d. Page 6, Paragraph 3.4.4, delete the paragraph in its entirety and replace it with the following:

"3.4.4 Surveyor

Survey, topographic survey, and hydrographic survey shall be performed by persons working under direct supervision of a Professional Surveyor and Mapper registered in State of Florida. PMS shall certify field notes, computations, and other records relating to surveys."

e. Page 9, Paragraph 3.8.1, delete the paragraph in its entirety and replace it with the following:

"3.8.1 Post-Construction Measurement and Inspection

Near end of work on each acceptance section notify Contracting Officer to conduct post-construction survey and inspection to ensure contract conformance. Submit certified survey data and correct contract drawings to show as-built information. Notify Contracting Officer to schedule a joint inspection of each acceptance section once deficiencies have been corrected."

SECTION 01500:

a. Page 3, Paragraph 1.3, delete "FIO" after "Mobilization/Demobilization Plan"

SECTION 02325:

a. Pages 4 & 5, Paragraph 1.3, delete "FIO" after "Notice of Intent to Dredge"; after "In-Place Measurement Survey Data"; after "Electronic Tracking System Data"; after "Equipment and Performance Data"; after "Notification of Discovery of Historical Period Shipwreck Sites"; after "Notice of Need for Dredging Survey"; after "Daily/Monthly Report of Operations"; after "Notice of Misplaced Material"; and after "Log of Near Beach Quality Sand Disposal".

b. Pages 16-19, delete paragraphs 3.5 through 3.5.8 in their entirety and insert in lieu thereof:

"3.5 SURVEYS

3.5.1 General

The Contracting Officer shall be notified, in writing, 10 days in advance of the need for <SUB>pre-dredging and after-dredging surveys. Surveys will be performed in accordance with the paragraph QUANTITY SURVEYS of Section 00800 SPECIAL CONTRACT REQUIREMENTS; paragraph LAYOUT OF WORK of Section 01000 GENERAL REQUIREMENTS; Section 01452 DREDGING/BEACH FILL PLACEMENT - CONTRACTOR QUALITY CONTROL; EM 1110-1-1000, EM 1110-1-1002, EM 1110-1-1003, EM 1110-1-1004, EM 1110-1-2909, and EM 1110-2-1003; FBPSM; and, TSS. A copy of the EM's can be downloaded from the following web site: <http://www.usace.army.mil/inet/usace-docs/eng-manuals/em.htm>. A copy of the TSS can be downloaded from the following web site: <http://tsc.wes.army.mil>.

3.5.2 Contractor Representative

All in-place measurement surveys and final acceptance sweep surveys will be performed with a representative of the Contractor on board the Government platform during the full execution of the survey. No in-place measurement or final acceptance sweep survey will be performed

without a representative of the Contractor on board the survey vessel. The Contractor's representative shall be fully knowledgeable in offshore construction subsurface surveying procedures, techniques, equipment, and horizontal and vertical calibration methods, and state-of-the-art horizontal and vertical accuracy limitations. The Contractor's representative shall observe and review, in progress, the adequacy and accuracy of the survey for in-place payment purposes, and for the potential existence of collusion, fraud, or obvious error in the data.

3.5.3 Survey Certification

a. Immediately upon completion of any survey, the Contractor's representative shall, based on his on-site review of the survey execution, determine that the survey contains no evidence of collusion, fraud, obvious error, and that subsequent horizontal and vertical corrections are accurately annotated on the subsurface record.

b. The Contractor's authorized representative shall bring aboard the survey vessel a blank copy of the Certification Statement and shall attest to an acceptable survey by signing the Certification Statement before leaving the vessel. Sample copy of the Certification Statement is appended to the end of this Section.

c. In the event the Contractor's authorized representative observes (and quantifies) specific documentary evidence of either fraud, collusion, or obvious error, the survey will be immediately rerun. Resurveys will totally supersede any previously run survey and will be run over the full reach of any particular Acceptance Section.

d. If acceptability is not acquired after performing one resurvey of an Acceptance Section, a meeting shall be held between the Contractor and the COR to expeditiously resolve the issue causing rejection of the survey. Contractor equipment and personnel standby time to resolve acceptability of the survey shall be at the Contractor's expense.

e. In no case shall a previously unacceptable survey be later judged acceptable by the Contractor; unless such a reassessment/reevaluation is performed within 24 hours after the original survey, and prior to initiating any resurvey action based upon identifiable collusion, fraud, or obvious error.

f. Should the Contractor or his authorized representative refuse to certify to the acceptability of a survey for contract payment without identifiable collusion, fraud, or obvious error, then the following actions will follow:

(1) Preconstruction (pre-dredging) Survey

Excavation shall not commence until representatives of the Contractor and Contracting Officer have met and resolved the basis for refusal of certification. Should the Contractor commence excavation prior to obtaining an acceptable survey, he shall be liable for any excavation performed. If a resurvey is performed,

and accepted, prior excavation will not be measured, estimated, or paid for.

(2) Post-construction (after-dredging) Survey

The 3-week survey window allowed under subparagraph "Measurement" of Section 01270 MEASUREMENT AND PAYMENT will be indefinitely extended until a final survey is accepted. Any material accretion which might occur due to such a time extension will neither be measured, estimated, or paid for.

(3) Refusal to Certify

Contractor equipment and personnel standby time to resolve his refusal to certify to the acceptability of a survey when there is no identifiable collusion, fraud, or obvious error shall be at the Contractor's expense and resultant delays shall not be the basis for time extensions of the contract.

g. Intermediate surveys taken between the pre-dredging and post-dredging surveys will not be considered for the purposes of determining quantities for final payment and acceptance of the area dredged."

c. Page 20, Paragraph 3.6.1, subparagraph "b", add the following at the end:

"However, the Contractor will not be required to furnish such facilities for the surveys prescribed in the paragraph FINAL EXAMINATION AND ACCEPTANCE, of this Section."

d. Page 20, Paragraph 3.7.1, delete the paragraph in its entirety and insert in lieu thereof:

"3.7.1 Final Examination of Work

As soon as practicable and no later than three (3) weeks after the completion of the entire work or any section thereof (if the work is divided into sections) as in the opinion of the Contracting Officer will not be subject to damage by further operations under the contract, such work will be thoroughly examined at the cost and expense of the Government by sounding or by sweeping, or both, as determined by the Contracting Officer. Should any shoals, lumps, or other lack of contract depth be disclosed by this examination, the Contractor will be required to remove same by dragging the bottom or by dredging at the contract rate of dredging. The Contractor or his authorized representative will be notified when soundings and/or sweepings are to be made and will be permitted to accompany the survey party. When the area is found to be in a satisfactory condition, it will be accepted finally. Should more than two sounding or sweeping operations by the Government over an area be necessary by reason of work for the removal of shoals disclosed at a prior sounding or sweeping, the cost of such third and any subsequent soundings or sweeping operations will be charged against the Contractor at the rate of \$5,500 per day for each day in which the Government plant is engaged in sounding or sweeping and/or is enroute to or from the site or held at or near the said site for such operation."

DESCRIPTIVE CHANGES TO SPECIFICATIONS ON THE PROJECT COMPACT DISC: The following are descriptive changes to the specifications exclusively on the project compact disc.

SECTION 00010:

a. Bid Schedule, delete the second Bid Schedule, CD pages 15-22. These pages are the second set numbered 00010-5 through 00010-12.

The following questions have been submitted. Responses are being provided to all bidders.

Q: Reference Section 02325, Paragraph D, Existing Weirs - The specifications mention the existence of weirs in the disposal area. On Drawing 3/3 (As Revised in Amendment 0001), the upland disposal area references abandoned riser pipes. Do these abandoned riser pipes correspond to the weirs mentioned in the above referenced section in the specifications? If not, where are the weirs located?

A: Not all of the riser pipes indicated on the drawing are labeled as "abandoned". See Dwg. 3/3, Zone C-3, the existing weirs as indicated in the specifications are labeled as "2-RISER PIPES, INVERT UNATTAINABLE DUE TO STRUCTURE" on the drawing. Only one riser is labeled as abandoned and it is separate from the other two.

Q: Reference Drawing 3/3. Is the Contractor allowed to land his discharge pipe anywhere along the perimeter dike as long as the discharge point is north of the line shown on the drawing?

A: Yes, the contractor may discharge at any location north of the line indicated on drawing 3/3, as long as turbidity standards at the weir outfall are met, as stated in Section 2325, paragraph 3.3.4.4.a.

Q: Reference Drawing 3/3 - When was the last time the disposal area was used?

A: 1990

Q: Does the Corps have a drawing showing the entire disposal area?

Q: Drawing 3/3, Survey data ends before the designated point of discharge in the middle of the Upland Disposal Area. Will additional survey data between the indicated point of discharge and current sounding data be provided to contractors? Is the point of discharge limited to the line specified in the drawings or will there be allowance for discharge at other locations within the disposal area?

A: *[Assuming this refers to a topographic survey]* No, a survey of the entire disposal area, D/A-A, is not available. A partial survey of the dikes was performed several years ago, but is not available electronically. A new survey is scheduled for completion prior to use and will be provided to the contractor for information purposes only.

Q: "Will the contractor be required to clear and grub any areas within the disposal area prior to discharge of dredged material into the disposal area?"

A: No, necessary clearing will be accomplished by separate contract prior to dredging.

Q: "If the contractor elects to use offloading equipment for upland disposal, are there any restrictions as to the location of the offloading equipment and operations?"

A: Yes, the offloading equipment will not be adjacent to and west of the submarine wharf. It must be placed south of the wharf and no closer than 500 feet to the wharf. Additionally, see attached drawing for possible pipeline routes.
